Personal Safety

While Australia is generally a safe place to live and study, it is still important that you take precautions to reduce the chance of an incident occurring.

Going out

When you are out with friends or by yourself, here are some simple things to consider:

- Always plan your trip home, especially at night. You may want to pre-book a taxi or arrange transport with a friend. Always make sure you have enough money to get home.
- Try to travel with a friend or in a group.
- Keep your bag and belongings close to your body and where you can always see them.
- Never hitch hike.
- If you don't have a mobile phone, make sure you have a phone card or money to make a phone call.
- Where available, use pedestrian walkways and cross the street at pedestrian crossings or lights.
- Leave valuables at home if you don't need to take them with you. This includes jewellery, electronic equipment such as iPads and your passport. If you've recently arrived and don't have anywhere permanent to live yet, talk to your institution's international student support staff about secure storage facilities on campus.
- Don't carry large amounts of money with you. You can access your money at ATMs found in shops, supermarkets, petrol stations, shopping malls, bars, shop fronts and many other public places.
- **Call 000 in the event of an emergency.** Remember, calls to 000 are free of charge.

Using Public Transport in Australia

Public transport is reliable and widely used in Australia, particularly in metro and urban areas. A number of security measures have been implemented to maximise the safety of public transport users including security officers and guards, help points, good lighting and security cameras. However, you should still use caution when travelling on public transport:

- Avoid isolated bus, rail and tram stops.
- Check transport timetables to avoid long waits, particularly at night.
- Train carriages nearest to the driver or guard are lit and safest at night.
- If you find yourself left in a train carriage on your own or with only one other person you may feel more comfortable moving to another carriage.

Taxis

Some tips when using taxis in Australia:

- Sit wherever you feel most comfortable – it is normal for passengers to sit in the front or the rear of the taxi.
- Always ensure you know the address of your destination before getting into the taxi.
- Tell the driver the route you would like to take to your destination, and don't be afraid to speak up if the driver takes you a different route, particularly one you are unfamiliar with.

- If you don't want the driver to know exactly where you live, get them to drop you off a short distance away.

On campus

When you are on campus during the day or night, here are some tips to help keep you safe:

- Make sure you are aware of the security and emergency arrangements at your campus and in your local area. You will be provided with emergency arrangements at the time of your orientation and a floor plan of level 2 and level 6.
- If you drive to your institution, try to park close to your destination and use well-lit car parks.
- When leaving your institution at night try to walk with a friend or group, and take paths that are well lit and ideally frequently used by other people when walking to the station at night after your class.

Under the Student Support Services, there are some organisations who provide additional information on using public transport in Australia.

Using the internet

When using internet, like anywhere in the world, you should protect yourself against spam, online scams like 'phishing', online bullying and identity theft. Many Australian internet service providers also offer guidance so check their website as well.

Home Safety

Safety at home is important, no matter where you live. Here are some tips to help keep you and your home safe.

- Always keep your doors locked – both when you are home and when you go out.
- Lock windows when you go out, or in rooms you are not in while at home.
- Do not let strangers into your house.
- Be careful of the information you give out to strangers through the internet, on social networking sites, or over the phone. If you are not at home or go on holidays do not make this information available to strangers.
- Smoke alarms will alert you to smoke on the property, so don't remove the batteries or tamper with them. If you live in a rental property, hostel or hotel it's the law to have smoke alarms fitted. If your property doesn't have them, talk to your landlord or real estate agent.
- If you come home to find evidence of a break in (broken window or door lock), contact the police from a safe location.

Sun and water safety

The Australian sun can be very hot and may be stronger than what you are used to in your home country. There are some steps you can take to protect your skin:

- Wear sunscreen protection (such as SPF30+ water resistant sun cream) and apply before you go outside.
- Apply sunscreen at least 25-30 minutes before swimming and ensure you re-apply sunscreen after swimming.
- Wear a hat and UV protective sunglasses.
- Avoid spending long periods of time in the sun between 10am and 3pm, as this is when the sun is strongest.
- Make sure you follow these tips even when it isn't sunny – you can still get burnt on cloudy or overcast days.

Australia has many beautiful beaches and waterways, but it is important to take care when swimming.

Here are some tips for staying safe in the water:

- Never dive into a body of water if you are not sure how deep it is.
- Only swim at patrolled beaches (a beach where there are lifeguards on duty - look for signs) and always swim between the red and yellow flags where lifeguards can see you.
- Many Australian beaches have 'rips'. These are strong underwater currents that can be hard to spot but which can draw you away from the shore quickly. If you swim between the flags you should not have any problem with rips. If you do find yourself in a rip, try not to panic or swim against it. Stay with your surfboard or other floating device if you have one. Swim gently parallel to the beach out of the rip zone, or wave and call for assistance from lifeguards or other swimmers and surfers.

For more information on water safety visit the Surf Life Saving website <https://sls.com.au/>
 Also watch the noticeboards and your emails, SBTA offers sessions throughout the year on beach safety.

Fire Safety

Fire awareness is essential in Australia, even in city and urban areas. If you experience a fire emergency, follow these steps:

1. Call 000 from any phone or mobile – it is a free call even from a mobile phone.
2. Say the word “fire” to the operator.
3. Don’t speak English? Just tell the operator your language and wait for instructions and you will be forwarded to a translator.
4. Answer the questions the operator asks.

Tips for fire prevention

- Make sure your house or room has a working smoke alarm.
- Wiring and electrical devices can overheat from too much use, especially in older buildings, so don't overload power boards or double adaptors.
- Keep electric heaters and radiators at least a metre from your bed, furniture or any curtains.
- Remember to turn off all appliances when finished cooking. Most household fires occur in the kitchen when grease, oil or other flammable cooking materials are left on the stove and forgotten.

Childcare services

There are also a wide variety of private and not-for-profit childcare centres available around Australia. The Australian government provides financial assistance to help parents with childcare costs. International students who receive direct financial assistance from the government, through a government scholarship, may be eligible to receive the child care benefit. To find out if you are eligible for child care financial assistance, read more at the Australia.gov.au website <https://www.australia.gov.au/information-and-services/benefits-and-payments/families>

Disability support

Australia has laws that protect individuals from discrimination in many areas of public life, including education. A person with a disability has just as much right to study as any other student. This means that institutions cannot:

- Refuse admission on the basis of disability.
- Accept a student with a disability on less favourable terms than other students (for example, asking for higher fees).
- Deny or limit access to a student with a disability (for example, not allowing access to excursions, or having inaccessible student common rooms or lecture facilities).

SBTA and SELA can offer services for students who require assistance with their studies because of a disability or chronic medical condition. These may include voice-recognition software, hearing aids or note-taking services. You should contact us several weeks before you arrive to make the appropriate arrangements for your specific needs.

Please note that whilst we can make every effort to accommodate a student with a disability we will not alter the outcome of the study you will be undertaking.

If you are experiencing a problem whilst at our campus, you should first talk to staff at. If informal discussions do not resolve the problem, you have the option of lodging a formal complaint. If you feel you have a legitimate complaint that is not being recognised by your institution, you should approach the Australian Human Rights Commission. Confidential enquiries can be made by telephone but a formal complaint must be lodged in writing before the commission can take action.
